

# CORE for Budget & Finance Teams

## How a Connected Payment System Can Help Budget & Finance Teams Save Time and Improve the Customer Payment Experience

When payment systems are siloed, fragmented, and disconnected, budget and finance teams at every organization—especially government agencies—are impacted greatly. These teams can find themselves lost in manual data updates, reconciliation tasks, managing budgets, and pulling reports.

### How disconnected payment systems impact budget and finance teams

#### 1 Manual Updates

Disconnected payment systems require manual updates for reports, budgets, and other tasks that should be automated.

#### 2 Poor Transparency

Disconnected payment systems prevent complete transparency when systems are siloed and data isn't accurate between platforms.

#### 3 Wasted Time

Disconnected payment systems waste time on menial tasks instead of spending time on big-picture strategy work.

### How connected payment systems impact budget and finance teams

- Establish complete transparency for end-to-end transaction completion
- Track revenue for every dollar to ensure allocation accuracy
- Reduce cost, risk, and resources spent on manual data entry of payments
- Improve accuracy in granular reporting of end-to-end revenue
- Eliminate PCI-related risk and increase compliance management

See how CORE solutions can help your agency save your team time, deliver a better consumer billing experience, and modernize payment requests, processing, and all back-office tasks.

### AUTOMATED RECONCILIATION

Designed to centralize your revenue collections, CORE’s automatic reconciliation offers a modernized way to reconcile cash, bank, and credit card payments in a single view. No spreadsheets, paperwork, or outdated reports — just real-time transaction-level reconciliation reports to help you drive action for your business.

### AUTOMATIC AND RECURRING PAYMENT OPTIONS

With CORE’s automatic and recurring payment options, agencies can eliminate the need for paper invoices and the time spent processing those payments. Customers can select payment dates that work best for them and agencies can increase payment completion rates.

### DIGITAL BILLING AND ONLINE PAYMENTS

CORE’s digital billing and online payment solutions allow consumers to log in online to make a payment, view bill details, and review payment history. Guest payments can be made by searching for account or bill numbers, address, name, or other identifiers. Plus, real-time, comprehensive reports are available to the treasury team with specifics on transactions, items/products, settlement summary, settlement details, and more.

### TEXT-2-PAY

With Text-2-Pay, CORE offers agencies a safer, faster, and more convenient option for payment requests and payments. Consumers can receive payment requests via text and make their payment in the same thread.
