

# CORE for Treasurers

## How a Connected Payment System Can Help Treasurers Save Time and Improve the Customer Payment Experience

When payment systems are siloed, fragmented, and disconnected, treasury teams at every organization — especially government agencies— are impacted greatly. Reconciliation processes take too much time, data accuracy is compromised, and compliance issues can run rampant.

### How disconnected payment systems impact treasury teams

#### 1 Create More Work

Disconnected payment systems create more work when treasurers are forced to track down payments or transactions.

#### 2 Wasted Time

Disconnected payment systems waste treasurers time on menial tasks instead of allocating time for more strategic work.

#### 3 Data Inaccuracy

Disconnected payment systems require treasurers to double check accuracy on payment information that is manually duplicated between disconnected systems

### How connected payment systems support treasury teams

- Ensure financial systems connect to automated procedures saving treasurers precious time every week, month, and year
- Manage accuracy in reconciliation to general ledgers and accounts reducing mistakes and human error often found in manual data entry
- Track payments, transactions, and allotments consistently for audits and legal compliance

See how CORE solutions can help your agency save your team time, deliver a better consumer billing experience, and modernize payment requests, processing, and all back-office tasks.

### AUTOMATED RECONCILIATION

Designed to centralize your revenue collections, CORE’s automatic reconciliation offers a modernized way to reconcile cash, bank, and credit card payments in a single view. No spreadsheets, paperwork, or outdated reports — just real-time transaction-level reconciliation reports to help you drive action for your business.

### AUTOMATIC AND RECURRING PAYMENT OPTIONS

With CORE’s automatic and recurring payment options, agencies can eliminate the need for paper invoices and the time spent processing those payments. Customers can select payment dates that work best for them and agencies can increase payment completion rates.

### DIGITAL BILLING AND ONLINE PAYMENTS

CORE’s ebilling and presentment payment solutions allow consumers to log in online to make a payment, view bill details, and review payment history. Guest payments can be made by searching for account or bill numbers, address, name, or other identifiers. Plus, real-time, comprehensive reports are available to the treasury team with specifics on transactions, items/products, settlement summary, settlement details, and more.

### TEXT-2-PAY

With Text-2-Pay, CORE offers agencies a safer, faster, and more convenient option for payment requests and payments. Consumers can receive payment requests via text and make their payment in the same thread.
